ABOUT THE GAME FILE . . .

Most die-hard Tecmo Super Bowl players have ideas about changes they would make to the game to make it better. Here are the hacks and edits that I believe make for the best game. To create the player ratings, I extracted this year's Madden ratings and fed them into a spreadsheet of my own formulas that then spits out Tecmo-compatible ratings. You might also notice that I'm actually using the "Running Power" attribute as an active category for offensive players instead of just assigning every player a 69 rating, as in the original game (which was, in my opinion, simply an oversight by the creators . . . or maybe just an easy way to finish the game and get it to market faster). I also changed its name to "Acceleration" to more accurately reflect its function. Here's an index of the hacks used to create this game, in no particular order, with authors in parenthesis:

- 32-team expansion rom (cx_rom, Maynard, Knobbe, others)
- helmets, field colors (keithisgood)
- COM looks for open receivers (jstout)
- COM Ultra Logic to play better defense (jstout)
- moving & dynamic grapples (bruddog)
- MAN vs. MAN popcorning (jstout)
- sort receiving leaders by yards (jstout)
- more accurate attribute labels, like "Acceleration" (Tecmonster)
- kicking arrow speed & range to make FG's easier (Tecmonster)
- COM minimum kickoff distance (bruddog)
- increase kickoff ball speed (maynard, bodom)
- increase shotgun snap speed (jstout)
- tougher to block FG's by adding personal protectors (Tecmonster)
- increase QB fumble rate (jstout)
- decrease diving animation time slightly (xplozv)
- decrease handoff animation time (xplozv)
- COM "juice" edited (by Tecmonster)
- PA affects "catchability/interceptability" of the pass (jstout)
- set kick returner farther back (bodom)
- Ball Control ratios edited so BC means more (by Tecmonster)
- static schedules from week to week (bruddog)
- Quickness changed to Coverage (jstout)
- kick returners use their own speed rating (konforce, jstout)
- stats screen at halftime (xplozv)
- corrected playoff bracket (pambazos)
- MAN-controlled QB rollouts on the rollout plays (Tecmonster)
- LB's moved farther back from line of scrimmage (Tecmonster)
- Run & Shoot QB's almost never scramble (Tecmonster)
- "heavy pass" teams don't pass quite as much (Tecmonster)
- PLAYBOOKS! (I have drastically changed the playbooks to make them more useful, logical, balanced, and modern), including:
 - improved blocking schemes for many run plays
 - brand new plays, including but not limited to:
 - Shotgun Zone Read RB R
 - Shotgun Zone Read QB L (with QB HP boost)
 - Shotgun Zone Read X Fly (pass)
 - Pro Set Quick Pitch L
 - Pro Set Quick Pitch R
 - Pro Set Zone Pitch R
 - 1back Offtackle R
 - 1back Pitch R
 - 1back Pitch L
 - Run and Shoot Y Pick
 - Shotgun XY Cross (in first pass slot)
 - 1back Flare C
 - Pro Z Deep Post
 - some receiving routes for existing plays improved
 - some receiving routes added, like for Oneback Flare A
 - massive re-organization of plays in each slot
 - thanks to bruddog, buck, and pambazos (zone read plays) for helping me understand play-making.
- team rosters, jersey #'s, faces (tommy2teeth)

TEAM OUTLOOK SUMMARY

These grades don't necessarily reflect the outlook of the actual NFL football teams, but rather their overall talent level in Tecmo Super Bowl. For instance, a major reason that the Broncos are great is because Peyton Manning might be the best decision-maker in the NFL, but that skill is moot in this video game because either a human player is making those decisions for him at QB, or a computer is, and the computer's decisions don't change based on the QB. Other players, like Jadeveon Clowney who are crazy fast at a combine, won't have crazy fast attributes because he's not expected to be "fast to the ball," at least early in his career (low Play Recognition & Pursuit ratings in Madden).

GRADE	CALIBER	TEAMS
A	SUPER BOWL FAVORITES	Seahawks, Patriots, 49ers, Chiefs
B	SUPER BOWL CONTENDERS	Broncos, Packers, Lions, Eagles, Browns, Bills, Saints, Dolphins, Cowboys
C	PLAYOFF CONTENDERS	Cardinals, Buccaneers, Ravens, Rams, Panthers, Texans, Chargers, Steelers, Redskins, Colts, Raiders, Bears
D	PLAYOFF LONGSHOTS	Bengals, Vikings, Falcons, Titans, Jets, Giants
F	HOPELESS	Jaguars

WHAT DOES EACH TEAM'S "SALARY CAP" MEAN?

The **SALARY CAP** section at the top right of each team profile is what the Reno Tecmo League uses for its fantasy draft, and it's derived from the combined talent level (total # of attribute points) of the team's offensive line and defense. The worse a team's "OL+Defense" is, the higher that team's salary cap will be, which is then used to buy that team's starting offensive skill players -- one QB, one RB, two WR's, one TE, and one FLEX player, which can be either a RB or a WR. The cost of each player = the total # of attribute points, converted to a dollar amount by dividing by 100. So, for example, a player with 287 attribute points, costs \$2.87 million against the salary cap. The Reno Tecmo League starts the draft with each owner drafting his base team, and then each ensuing round is used to fill out the rest of his roster (the aforementioned starting offensive skill players). TSBToolSupreme is used to edit rosters but, if you do this, the game might experience a glitch after editing, and that glitch is rooted in the moving grapples hack. Check the thread where you downloaded this game to get the fix.

CINCINNATI BENGALS

PREFERENCE **BALANCED** ANALYSIS: Grade D team. RB Bernard is primed for a breakout year and WR A.J. Green is a prodigious pass-catcher, but QB Dalton hasn't impressed. DT Atkins is monster on the d-line, and that frees up tackling machine Vontaze Burfict. FS Reggie Nelson can do it all.

CLEVELAND BROWNS

PREFERENCE **BALANCED** ANALYSIS: Grade B team. Johnny Football arrives and he looks to be the one-man dynamo he was in college. Gordon is a star, but RB spot is in flux. The secondary, led by ball-hawking CB's Haden & Gilbert, is a great unit inside an otherwise subpar D.

INDIANAPOLIS COLTS

PREFERENCE **HEAVY PASS** ANALYSIS: Grade C team. With sneaky athleticism, Andrew Luck is the total package at the QB position, but the RB corps is light on talent. Robert Mathis is one of the fastest LB's in the NFL and he leads a defense that is solidly balanced at every level, but no stars.

PREFERENCE HEAVY PASS

ANALYSIS: Grade C team. The offensive attack is heavily dependent on multi-talented RB Matt Forte, but strong-armed QB Jay Cutler does have two of the best WR's in the NFL in his arsenal. The re-built defense is improved over last season, but there are no stars there.

ANALYSIS: Grade B team. Offense is loaded with elite skill -- Reggie Bush is one of the best all-around RB's in the league and Calvin Johnson is the best WR. Rocket-armed QB Stafford is the beneficiary. D-line might be the league's best, but the back 7 is mediocre.

PREFERENCE	BALANCED	ANALYSIS: Grade A team. A balanced, talented, and deep team, they are a favorite to win the Super Bowl. Headlined by multi-talented QB Colin Kaepernick on offense and a band of A+ receivers and linemen, they also showcase the NFL's #1 rated group of LB's.									SALARY CAP	ANALYSIS: Grade C team. Mediocre QB is complemented by underrated RB Zac Stacy and top-shelf speed at WR/TE. DE Robert Quinn is all over the field on defense and he needs to be, because the rest of his teammates on that side of the ball are OK at best.									SALARY CAP

SEATTLE SEAHAWKS											ARIZONA CARDINALS																						
PREFERENCE	RUN	ANALYSIS: Grade A team. QB Russell Wilson leads a potent and balanced offense with "Beastmode" Marshawn Lynch crushing skulls out of the backfield. Their secondary is the best in the league, with superb speed, hitting, and coverage ability. LB Wagner is a star too.									PREFERENCE	HEAVY PASS	ANALYSIS: Grade C team. The Cardinals boast one of the most dynamic players in the NFL in CB Patrick Peterson. DL Campbell and LB Washington do an excellent job in front of him too. Besides WR Fitzgerald though, the offense lacks punch.									PREFERENCE	SPREAD										SALARY CAP
